MEDICAID SERVICES STATE BY STATE

October 1, 1990

Basic Required Medicaid Services

Medicaid recipients receiving federally-supported financial assistance must receive at least these services:

- Inpatient hospital services
- Outpatient hospital services
- Rural health clinic services
- Other laboratory and x-ray services
- Nurse Practitioners' services
- Nursing facility (NF) services and home health services for individuals 21 and older
- Early and periodic screening, diagnosis, and treatment for individuals under 21
- Family planning services and supplies
- Physicians' services
- Nurse-Midwife services

Federal financial participation (FFP) is also available to States electing to expand their Medicaid programs by covering additional services and/or by including people eligible for medical but not for financial assistance. For the latter group, States may offer the services required for financial assistance recipients or may substitute a combination of seven services.

Although States must assure the availability of necessary transportation, they may seek FFP either as an optional service or as an administrative cost.

Definitions and limitations on eligibility and services vary from State to State. Details are available from local welfare offices and State Medicaid agencies.

Services provided only under the Medicare buy-in or the screening and treatment program for individuals under age 21 are not shown on this chart.
